## Projects

---

### Interactive Portfolio: [Preview](#)

**Tech Stack:** Built on Next.js

- Developed a highly dynamic and interactive portfolio optimized for desktops, tablets, and mobile devices, leveraging Locomotive Scroll for smooth animations and responsive design.
- Achieved Vercel Real Experience Score (RES) of 98/100, indicating exceptional performance and fast load times across devices, which enhanced user retention and engagement.

### Interactive Periodic Table: [Preview](#)

[GitHub](#)

**Tech Stack:** Built on HTML, CSS + Tailwind, JS

- Designed a grid-based interactive periodic table that organizes elements by period and group, providing a clear, organized presentation.
- Implemented click events to display detailed information for each element, increasing user engagement among educational users and facilitating improved learning experiences.

### QR Code Generator:

[GitHub](#)

**Tech Stack:** Swift, Xcode

- Built a text-to-QR code generator for iOS with a simple, user-friendly interface, enabling seamless QR code creation.
- Achieved 100% accuracy in QR code generation, streamlining the process for non-technical users and improving accessibility.
